 - a. Yanai et al. (U.S. Patent Application Publication 2002/0057354) discloses a solid state image pickup device wherein there is a vertical addition means and a horizontal addition means. However, the photoelectric conversion elements are all read out to the vertical charge transfer path at the same time and then added, which differs from the claim invention in that the claimed invention requires there to be a first subset of pixels read out, shifted, and then a second subset of pixels read out to be added to the first subset of pixels. Furthermore, Yanai et al. fails to add pixels of the same color.
